Dublin 24, Ireland
Tel: +353 (0) 1 208 2259
E-mail: 2rn@2rn.ie

Interference on Viewers' Television Sets and/or Broadcast Radio Receivers

1. When 2RN is put on notice, whether by telephone or written communication, that a viewer is having problems with their reception, 2RN will undertake a preliminary assessment, over the telephone or by other means of communication, and ascertain whether or not the wind farm is a likely cause of the interference complained of.
2. If 2RN believes the interference is wind farm related, the viewer will be asked to contact the wind farm developer. Then the developer will arrange for a local dealer to visit the viewer.
3. Both parties to this protocol note that the type of interference caused by electromagnetic disturbance emanating from wind farms manifests itself in very specific ways on television sets and broadcast radio receivers.
4. The local dealer will arrange directly with the viewer to make a visit to the viewer's house and assess the cause of the interference. The local dealer will take whatever steps are necessary to remedy the interference.
5. The local dealer will prepare a brief report in writing which will be sent to the developer. If the local dealer is of the view that the interference is due to interference from the development, the dealer will send an invoice in respect of the site visit and remedial work to the developer. The developer is the party primarily liable for the discharge of any amounts due in respect of any such site visit and remedial work. If the local dealer identifies that the problem is due to some other cause, the local dealer will invoice the viewer in the usual way.
6. Where the reception interference problem affects a number of viewers in the same vicinity, and this is identified by the local dealer and/or 2RN, it may be that it will be necessary for 2RN to develop an existing alternative or additional transposer site within that locality.
7. The developer in this instance will be responsible for all the costs associated with the development of the new transposer site, where this transposer site is necessitated by the presence of the development.
8. The maximum expenditure incurred by 2RN in the provision of the new transposer site (arising from section 6) will be €150,000, (such figure to be index linked upwards only – by reference to the Consumer Price Index published by the Central Statistics Office, calculated on the basis of the average increase over the 12-month period preceding demand for reimbursement by 2RN). A detailed estimate is to be submitted to the Developer in advance for comment, within a reasonable timeframe.

Old Belgard Road, Tallaght,
Dublin 24, Ireland
Tel: +353 (0) 1 208 2259
E-mail: 2rn@2rn.ie

9. If the cost of acquiring and developing a new transposer site exceeds the sum of €150,000 the developer and 2RN will enter into negotiations to ascertain how the cost of remedying the problem being experienced by viewers in the locality might most equitably be met. The developer, however, shall be the party primarily liable for the discharge of any amounts due in respect of the acquisition and development of a new transposer site to the extent that such an acquisition and development is attributable to the presence of the development.
10. Where the acquisition and development of a transposer site is additional to the transposer(s) serving the locality prior to the commencement of operation of the development, the developer shall be liable to reimburse to 2RN the ongoing operational costs of the said additional transposer for so long as same shall be necessary to counteract the interference with viewers' reception caused by the development, up to a maximum of €15,000 per annum (such figure to be index linked – upwards only – by reference to the Consumer Price Index published by the Central Statistics Office, calculated on the basis of the average increase over the 12 month period preceding demand for reimbursement by 2RN).
11. The developer will be entitled to see copies of operational costs to the extent that company confidentially is not breached. All the 2RN costs involved in investigation and reports associated with the proposed development shall be covered by the developer if it is found that the said development is the cause of the interference.
12. The developer shall be entitled to retain its own engineer to inspect and report on the source of interference and if a transposer site is built, 2RN undertakes to facilitate access to the installation in question for the purposes of carrying out any such inspection and/or tests necessary.
13. The developer will indemnify 2RN fully in respect of damage to the person or property of any such engineer or inspector as retained by the developer, or any other agent or licensee of the developer involved in or associated with such inspection and/or tests. The developer will ensure that competent personnel only are deployed onto 2RN property under the terms of this clause and hereby indemnify 2RN in respect of any damage to 2RN's property or personnel caused by the negligence of such engineer, inspector or other agent or licensee.

Old Belgard Road, Tallaght,
Dublin 24, Ireland
Tel: +353 (0) 1 208 2259
E-mail: 2rn@2rn.ie

Interference with 2RN installations (to include transmitter stations, transposers and, if applicable, links stations)

14. Where 2RN detects interference with the reception of a receive and/or transmission signal at a transposer site, 2RN will investigate the cause of the interference and report in writing to the developer if 2RN determines that the interference is attributable in whole or in part to the development.
15. The developer shall be entitled to retain its own engineer to inspect and report on the source of interference and 2RN undertakes to facilitate access to the installation in question for the purposes of carrying out any such inspection and/or tests necessary.
16. The developer will indemnify 2RN fully in respect of damage to the person or property of any such engineer or inspector as retained by the developer, or any other agent or licensee of the developer involved in or associated with such inspection and/or tests. The developer will ensure that competent personnel only are deployed onto 2RN's property under the terms of this clause and hereby indemnify 2RN in respect of any damage to 2RN's property or personnel caused by the negligence or such engineer, inspector or other agent or licensee.
17. Engineers representing both 2RN and (if applicable) the developer, will agree on remedial works (e.g. reorientation of reception antennas, additional filtering, alternative fibre optic connection) and the cost of same. 2RN shall carry out the necessary remedial works and the cost of same shall be discharged/reimbursed to 2RN by the developer (subject to the provisions below).

In the following paragraph, the term "installation" shall mean one or more installation sites if applicable.

18. In the event that an additional or alternative installation is required in order to overcome reception or transmission problems caused exclusively by the development, 2RN shall identify a new location for such installation, within a reasonable timeframe.
19. The developer shall be responsible for all costs associated with the development of the new installation (e.g. repeat broadcasting station), where the new installation is necessitated exclusively because of interference caused by the development. The developer shall be liable for such costs up to a maximum of €150,000 (such figure to be index linked – upwards only – by reference to the Consumer Price Index published by the Central Statistics Office, calculated on the basis of the average increase over the 12-month period preceding demand for reimbursement by 2RN). Where the likely costs of such additional or alternative installation exceed €150,000 (as adjusted), 2RN and the Developer shall negotiate and determine between them how the costs of this new development might most equitably be met.

Old Belgard Road, Tallaght,
Dublin 24, Ireland
Tel: +353 (0) 1 208 2259
E-mail: 2rn@2rn.ie

The projected costs are to be submitted to and agreed with the developer prior to development of the new installation, within a reasonable timeframe.

20. Where the acquisition and development of a transposer site is additional to the transposer(s) serving the locality prior to the operation of the development, the developer shall be liable to reimburse to 2RN the ongoing operational costs of the said additional transposer for so long as same shall be necessary to counteract the interference with viewers' reception caused by the development, up to a maximum of €15,000 per annum (such figure to be index linked – upwards only – by reference to the Consumer Price Index published by the Central Statistics Office, calculated on the basis of the average increase over the 12-month period preceding demand for reimbursement by 2RN).
21. The developer will be entitled to see copies of operational costs to the extent that company confidentially is not breached. All the 2RN costs involved in investigation and reports associated with the proposed development shall be covered by the Developer if it is found that the said development is the cause of the interference.
22. The parties agree that any dispute which arises concerning the interpretation of this Agreement shall first be referred to: -
 - (a) in the case of 2RN, the Executive Director for the time being; and
 - (b) in the case of the Developer, the Executive Director for the time being;and such persons shall use all reasonable commercial efforts to resolve any such dispute within ten (10) Business Days.
23. If the dispute is not resolved by the relevant parties within the time period referred to above then save in respect for a dispute referable to the Expert, the parties may by agreement in writing attempt to settle all other disputes by mediation in accordance with the rules of the International Centre for Dispute Resolution (ICDR). To initiate the mediation a party must give notice in writing to the other party to the dispute requesting mediation and a copy of the request must be sent to ICDR. The mediation will start not later than 20 days after the date of such notice. The commencement of mediation will not prevent the parties commencing or continuing court proceedings. Unless otherwise agreed between the parties
 - (a) the mediator will be nominated by ICDR;
 - (b) the costs of the mediator shall be borne and discharged as to 50% by the Company and as to the remaining 50% by the Developer, and

Re: Coolglass Windfarm Environmental Impact Assessment Report – Scoping and Consultation

Dear Mr. O'Reilly,

I write with response to your letter and e-mail dated 17th October re. Coolglass Windfarm.

I wish to advise at the outset that any determination in relation to a planning consent is solely a matter for the planning authorities and/or ABP, as appropriate. Therefore, the following observations are made on a non-prejudicial basis, and are not intended to be used to rely on for a prospective planning application, nor are these observations to be relied on in the event of any commercial transaction pertaining to such lands and they are not to be relied on in the event of any contract exchange pertaining to same.

Based on the information supplied and having consulted with the subject matter experts in the Irish Air Corps, the Department of Defence wishes to make the following observation:

Single turbines, structures, or turbines delineating the windfarm should be illuminated by Type C, Medium intensity, Fixed Red obstacle lighting with a minimum output of 2,000 candela to be visible in all directions of azimuth and to be operational H24/7 days a week. Obstacle lighting should be incandescent or of a type visible to Night Vision equipment. Obstacle lighting must emit light at the near Infra-Red (IR) range of the electromagnetic spectrum, specifically at or near 850 nanometres (nm) of wavelength. Light intensity to be of similar value to that emitted in the visible spectrum of light.

Nothing in the above observations shall be taken as a binding response by the Minister for Defence in the event that a planning application is made. The Minister reserves the right to comment on the actual planning application as and when it is submitted in accordance with the provisions of the planning regulatory code.

Furthermore, we would appreciate if you could keep us informed on all developments relating to this proposed development, especially if it progresses to the planning stage.

Please get in contact if you have any queries in this regard.

Yours faithfully,

Sent via e-mail

Subject: RE: Coolglass Wind Farm Environmental Impact Assessment Report – Scoping and Consultation

You don't often get email from rwoods@bai.ie. [Learn why this is important](#)

Hi Crystal

The BAI does not perform an in-depth analysis of the effect of wind turbines on FM networks. However, we are not aware of any issues from existing windfarms into existing FM networks. Also, the proposed windfarms are not located close to any existing or planned FM transmission sites.

Regards

Roger

Subject: Coolglass Wind Farm Environmental Impact Assessment Report – Scoping and Consultation

Dear Sir / Madam,

Please find attached the following items for consultation for the above named project

- Consultation Letter
- Site layout plan
- Site location plan

- Scoping Report

This letter is being issued to you as part of the consultation process for the EIAR. As part of the consultation process, we would be interested in receiving any comments you may have on the proposed development, relevant to your area of expertise, before **15th July 2022** in writing or in email to: Cleiker@slrconsulting.com.

The coordinates of the proposed wind turbines are:

| Turbine | X | Y |
|---------|--------|--------|
| 1 | 655032 | 687985 |
| 2 | 655375 | 688632 |
| 3 | 655639 | 688352 |
| 4 | 656117 | 688150 |
| 5 | 656812 | 688401 |
| 6 | 656563 | 687955 |
| 7 | 657154 | 687731 |
| 9 | 657537 | 684464 |
| 10 | 657391 | 684900 |
| 11 | 656562 | 684216 |
| 12 | 656623 | 683576 |
| 13 | 656978 | 684062 |
| 14 | 657269 | 683870 |

Yours Sincerely,

Crystal Leiker

Dear Sir / Madam,

Please find attached the following items for consultation for the above named project

- * Consultation Letter
- * Site layout plan
- * Site location plan
- * Scoping Report

This letter is being issued to you as part of the consultation process for the EIAR. As part of the consultation process, we would be interested in receiving any comments you may have on the proposed development, relevant to your area of expertise, before 15th July 2022 in writing or in email to: Cleiker@slrconsulting.com<<mailto:Cleiker@slrconsulting.com>>.

The coordinates of the proposed wind turbines are:

- Turbine
- X

Hi Crystal,

There is no risk of interference to our fixed linking. We are concerned about the risk to broadcast services in the area and would request that the attached protocol be signed between 2rn and the Developer should the site go ahead.

Hi Matthew,

I hope you are well.

A few months ago I sent across a scoping report for Coolglass wind farm (see email chain below).

At this time, you had indicated to us that 2 turbines were of concern and that a 2RN Protocol agreement would need to be signed.

Please note that turbine locations have moved since this correspondence as per **revised coordinates** below. If a 2RN Protocol Agreement is still required, please send a copy of this agreement across in your reply.

Kind Regards,

Crystal

Subject: RE: Coolglass Wind Farm Environmental Impact Assessment Report – Scoping and Consultation

You don't often get email from matthew.craig@2rn.ie. [Learn why this is important](#)

Hi Crystal,

As discussed in our call yesterday, please send your enquiries regarding the impact of windfarms RTÉ services to windfarms@rte.ie.

From your coordinates, which is all that I received in the end of the chain, there are two turbines that are a cause for concern for us.

The DTT path between our sites at Mt. Leinster and Arklow passes close to turbines 1 (58m away) and 2 (84m away).

| Site | Lat. | Long | Ant. Height AMSL(m) | Freq. (MHz) |
|--------------|-----------|----------|------------------------|-------------|
| Mt. Leinster | 52.617839 | -6.77954 | 899 | 490 |
| Arklow | 52.78949 | -6.16131 | 45 | |

There is also the risk of interference to broadcast services in the area to the north east of the turbines for our services from Mt Leinster.

We would therefore ask for a protocol to be signed between the developer and 2rn should the site go ahead.

Regards

Matthew Craig

Hi Celine,

I don't have the direct email, but this is in relation to potential impacts on signal caused by the erection of wind turbines- perhaps this should be sent to a technician familiar with the location of all towers operated by RTE?

Kind Regards,
Crystal Leiker

Dear Sir / Madam,

Please find attached the following items for consultation for the above named project

- * Consultation Letter
- * Site layout plan
- * Site location plan
- * Scoping Report

This letter is being issued to you as part of the consultation process for the EIAR. As part of the consultation process, we would be interested in receiving any comments you may have on the proposed development, relevant to your area of expertise, before 15th July 2022 in writing or in email to: Cleiker@slrconsulting.com<mailto:Cleiker@slrconsulting.com>.

The coordinates of the proposed wind turbines are:
